RIVET NUT INTRODUCTION

RIVET NUT INTRODUCTION

RIVET NUT INTRODUCTION

Blind Rivet Nuts provide load-bearing threads in thin sheet materials that are too thin for a tapped thread. Blind Rivet Nuts also are used when an application has little or no access to the backside as they can be installed from the front side of the work piece.

ADVANTAGES OF RIVET NUTS

- Rivet Nuts provide a strong thread in thin materials that cannot be tapped.
- Rivet Nuts can be installed from one side of the work piece, also known as a "Blind Application."
- Rivet Nuts are ideal when easy disassembly and reassembly of products is required.
- Rivet Nuts can be installed in many different kinds of material including steel, plastic and fiberglass.
- Once Rivet Nuts are installed, additional components with threaded fasteners can be attached.
- Rivet Nuts do not need to be welded to the base material.
- Prepainted material will not be damaged during the Rivet Nut installation process.
- Rivet Nuts are available in many different styles & materials for many different types of applications.

APPLICATIONS: INDUSTRIES

Rivet nuts are used in a variety of industries:

- Automotive
- HVAC
- Aerospace and Defense
- Agricultural and Construction Equipment
- General Industrial
- Electronics
- Medical
- Railways
- Heavy Truck (Class 8)
- Solar

Examples are shown below.

EXAMPLES OF RIVET NUT APPLICATIONS

After Market Vehicle Retrofit - Tool Box

Vehicle Accessory - Pickup Side Rail

Appliance - Washer Tub Base

Agricultural – High Strength Rivet Nut

FHK/ FHL series

FHK & FHL SERIES LARGE AND SMALL FLANGE FULL HEX SERIES

- The FHK/FHL series provides increased spin out resistance over round body and half hex body rivet nuts.

- Proven to meet Class 8 and Grade 5 thread strength.

- The FHK series has a small flange for a near flush installation.

FHK - SMALL FLANGE UNIFIED THREAD (UNIT - INCHES)

- The FHL series has a large flange to provide increased strength in punched and drilled holes.

Sherex full hex rivet nuts are compatible with the following
GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8
 Please contact Sherex when using other grade fasteners.

IMPERIAL/INCH BODY STYLE RIVET NUTS

**IMPERIAL/
INCH
BODY
STYLE
Rivet Nuts**

- Imperial/Inch body styles are designed to be placed in fractional or common inch drill/punch hole sizes.
- They are the most common styles used in the American marketplace.
- Most of the inch/imperial body styles are available with metric threads.
- All parts are manufactured by Sherex Taiwan, our ISO/TS 16949 certified production facility.
- Special designs are available to meet customer specific requirements. Contact Sherex with your application information.

CAL Specifications

Material: Steel 1008/1010
Stainless Steel 302*
Aluminum 5056

RoHS Compliant Finishes:

Zinc Plated-Yellow Trivalent Chromate
per Sherex SFS-01-001, SC2

Zinc Plated-Clear Trivalent Chromate
per Sherex SFS-01-001

Part Number

Example: CAL2-2520-165

CAL	2	2520	165	()
Product Style	Material	Thread Size	Grip Range	Empty-Open End
Large Flange	1-Stainless Steel			B-Closed End
Knurled Body	2-Steel			T-Clear Trivalent
Thin Wall Series	3-Aluminum			W-Wedge Head
				S-Sealed

Special finish or material available upon request

*Contact Sherex for exact product dimensions in Stainless Steel.

Grip range can be affected by parent material and hole size. Sherex recommends trial installations to determine the proper grip range for the application.

Contact Sherex for details.

CAL style rivet nuts are available in sealed, closed end, and wedge head designs by special order. Other specials available upon request.

Contact Sherex for test data.

INSTALLATION TOOLING

CAL Series can be installed with our Hand Tools, Pneumatic Tools, and Hydro-Pneumatic Tools.

For additional tooling information see pages 38-42.

Sherex rivet nuts are compatible with the following hardware:

GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8

Please contact Sherex when using other grade fasteners.

- The CAK series has a small flange for a near flush installation.
- Knurled body provides a higher resistance to spin out when installed in soft materials.

PART NUMBERING SYSTEM

CAO Specifications

Material: Steel 1008/1010
Aluminum 5056

RoHS Compliant Finishes:

Inch: Zinc Plated-Clear Trivalent Chromate
per Sherex SFS-01-001

Metric: Zinc Plated-Yellow Trivalent Chromate
per Sherex SFS-01-001, SC2

Part Number

Example: CAO2-2520-165

CAO	2	2520	165	()
Product Style	Material	Thread Size	Grip Range	Empty-Open End
Low Profile	2-Steel			B-Closed End
Smooth Shank	3-Aluminum			T-Clear Trivalent
Thin Wall Series				

Special finish or material available upon request

Grip range can be affected by parent material and hole size. Sherex recommends trial installations to determine the proper grip range for the application.
Contact Sherex for details.
Contact Sherex for test data.

INSTALLATION TOOLING

CAO Series can be installed with our Hand Tools, Pneumatic Tools, and Hydro-Pneumatic Tools.
For additional tooling information see pages 38-42.

Sherex rivet nuts are compatible with the following hardware:
GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8
Please contact Sherex when using other grade fasteners.

CFW/CAW DIAMOND KNURLED 360° SWAGING SERIES

Material thickness .062"/1.57 min

**CFW/
CAW
series**

UNIFIED THREAD (UNIT - INCHES)

- The CFW/CAW series offers a knurled body for increased spin out resistance in soft materials such as fiberglass and plywood.
- Increased wall thickness gives increased shear strength.
- Cadmium Free finish allows the CFW Series to be used in any industry, including automotive.

PART NUMBERING SYSTEM

CFW/CAW Specifications
Material: Stainless Steel, 304 L
 Steel, 12L14
 Steel, 1215

Finish: CAW is Cadmium Plated per QQ-P-416 Type 1, Class 3 with clear protective coating
 CFW is Proprietary Tin Plated

Part Number
 Example: CAW2-2520

CAW	2	2520
Cadmium W series	Material	Thread Size
Featuring 360° Swaging	1-Stainless Steel	
	2-Steel	

Special finish or material available upon request

*CFW and CAW rivet nut styles are dimensionally the same. CFW is Cadmium Free and RoHS Compliant.

Actual hole size can be affected by parent material and material thickness. Contact Sherex for details.
 CFW/CAW series available in different finishes. Other specials available upon request.
 Contact Sherex for test data.

INSTALLATION TOOLING

CFW/CAW Series can be installed with our Hand Tools, Pneumatic Tools, and Hydro-Pneumatic Tools.
 For additional tooling information see pages 38-42.

Sherex rivet nuts are compatible with the following hardware:
GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8
 Please contact Sherex when using other grade fasteners.

CFT/ CAT series

- The CFT/CAT series offers one rivet nut for materials of any thickness greater than .030 inches.
- Cadmium Free finish allows the CFT Series to be used in any industry, including automotive.
- Designed to be used in metal applications.

CFT/CAT KNURLED 360° SWAGING SERIES

CPB PREBULBED SLOTTED BODY SERIES

CPB series

Installs into single, variable, or multiple thickness materials.

- The CPB series offers a large grip range for installation into single, variable or multiple thickness materials.
- Large backside footprint provides increased pull out resistance.
- Designed to be installed in thin plastics without distorting the base material.

Heavy Duty	1-Stainless Steel			B-Closed End
Large Flange	2-Steel			
CFHD - High Strength	3-Aluminum			

Special finish or material available upon request

Sherex rivet nuts are compatible with the following hardware:

GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8

Please contact Sherex when using other grade fasteners.

**METRIC
BODY
STYLE
Rivet Nuts**

METRIC BODY STYLE RIVET NUTS

- Metric body styles are designed to be placed into metric drilled or punched holes.
- Many of the metric body styles are available with inch/imperial thread.
- The products are manufactured in our ISO/TS 16949 certified production facility or by our Belgium partner, Dejong.
- Special designs are available to meet customer specific requirements. Contact Sherex with your application information.

CATALOG ATTRIBUTES - METRIC BODY STYLE

*316 Stainless Steel has extra corrosion resistance and can be used in the medical, chemical and food industries.

Grip Range can be affected by parent material and hole size.
 Sherex recommends trial installations to determine the proper grip range for the application.
 Closed End sizes available: M4, M5, M6, and M8.
 Also available with imperial threads - minimum order quantity is 25,000 pieces if not in stock.
 Contact Sherex for test data.

INSTALLATION TOOLING

UPO Series can be installed with our Hand Tools, and Hydro-Pneumatic Tools.
 For additional tooling information see pages 38-42.

All Parts have been manufactured by: **DEJOND**

TUBTARA®- A DEJOND PRODUCT
 Sherex rivet nuts are compatible with the following hardware:
GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8
 Please contact Sherex when using other grade fasteners.

UFO/ UKO series

UFO COUNTERSUNK HEAD & UKO SMALL FLANGE METRIC SERIES

- The UFO series offers a countersunk head for flush installation into the parent materials.
- The metric body dimensions allow for use in metric holes.

- The UKO series offers a small flange head for near flush installation.
- The metric body dimensions allow for use in metric size holes.

HUPO & HUKO LARGE AND SMALL FLANGE HEXAGONAL METRIC SERIES

**HUPO/
HUKO
series**

- The HUPO series has a large flange that provides increased strength.
- Hexagonal shank body for improved spin out.
- The metric body dimensions allow for use in metric holes.

- The HUKO series has a smaller flange head that gives a near flush installation into the parent material.
- Hexagonal shank body for improved spin out.
- The metric body dimensions allow for use in metric holes.

PART NUMBERING SYSTEM

UPO RS/UFO RS Specifications

Material:
Steel QST 34-3

RoHS Compliant Finish:
Zinktop (Clear), 96 w / 480 r

Part Number

Example: TU-SM5UPO30RZT

TU S M5 UP O 30 R ZT
Product Style: Material Thread Size Product Type O-Open End Grip Ribbed Zinktop (Clear)
Metric S-Steel Large Flange, Flat Head Metric Body

Part Number

Example: SM5UFO40RZT

TU S M5 UF O 30 R ZT
Product Style: Material Thread Size Product Type O-Open End Grip Ribbed Zinktop (Clear)
Metric S-Steel Smooth Shank Countersunk Head Metric Body

Special finish or material available upon request

Grip Range can be affected by parent material and hole size.
Sherex recommends trial installations to determine the proper grip range for the application.
RoHS Compliant Trivalent Plating available upon request.
Also available with imperial threads - minimum order quantity is 25,000 pieces if not in stock.
Contact Sherex for test data.

INSTALLATION TOOLING

UPO RS/ UFO RS Series can be installed with our Hand Tools and Hydro-Pneumatic Tools.
For additional tooling information see pages 38-42.

All Parts have been manufactured by: DEJOND

TUBTARA®- A DEJOND PRODUCT
Sherex rivet nuts are compatible with the following hardware:
GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8
Please contact Sherex when using other grade fasteners.

UKO AND HUKO IMPERIAL THREAD SERIES - STAINLESS STEEL

UKO/ HUKO INCH series

UKO UNIFIED THREAD (UNIT - INCHES)

Part Number (304 Stainless Steel)	Thread Size	Grip Range (E)		L	D	K	Diameter-Inch (d)	Diameter-Metric (d)	Hole Size - Inch (b ^{+0.004})	Hole Size - Metric (b ^{+0.1})
		Min.	Max.							
TU-SS1032UKO30	10-32 UNF	.020	.118	.472	.295	.020	.276	7.0	.276	7.0
TU-SS2520UKO30	1/4-20 UNC	.020	.118	.571	.374	.020	.354	9.0	.354	9.0
TU-SS3118UKO30	5/16-18 UNC	.020	.118	.630	.453	.020	.433	11.0	.433	11.0

- The UKO inch series has a smaller flange head that gives a near flush installation.
- Round shank body.
- Dimensions in inches.

HUKO UNIFIED THREAD (UNIT - INCHES)

Part Number (304 Stainless Steel)	Thread Size	Grip Range (E)		L	D	K	Diameter-Inch (d) (A/F)	Diameter-Metric (d) (A/F)	Hole Size - Inch (b ^{+0.004}) (A/F)	Hole Size - Metric (b ^{+0.1}) (A/F)
		Min.	Max.

CLM & CKM style rivet nut specials available upon request.
Contact Sherex for test data.

INSTALLATION TOOLING

CLM/CKM Series can be installed with our Hand Tools, and Hydro-Pneumatic Tools.
For additional tooling information see pages 38-42.

Sherex rivet nuts are compatible with the following hardware:
GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8
Please contact Sherex when using other grade fasteners.

PLATING: CR AND CRE SERIES

Corrosion Resistant - Long Life Plating Options

CR SERIES

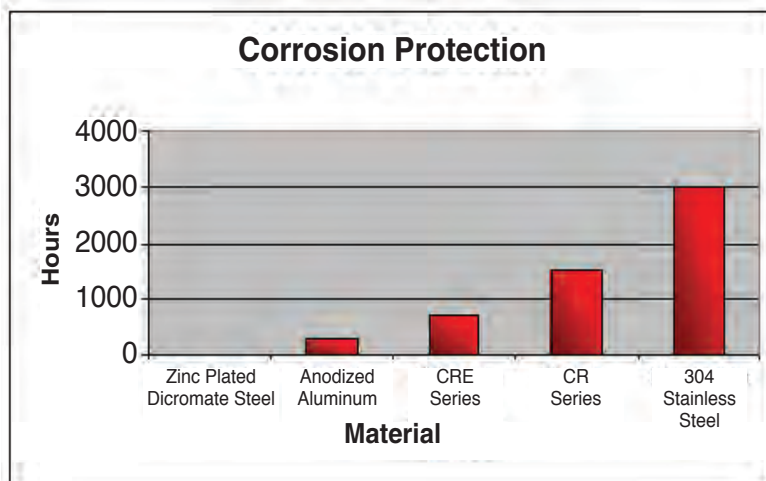

- Proprietary Zinc Nickel Plating.
- CR Series is certified to over 1,000 hrs of corrosion protection before red rust.
- Available on all rivet nuts in silver (standard), black or yellow.

CRE SERIES

- Proprietary Zinc Plating.
- More economical for lower corrosion resistance requirements.
- CRE Series is certified to over 500 hrs of corrosion protection before red rust.
- Available in silver (standard) or black.

RoHS REQUIREMENTS

- The CR & CRE Series are RoHS compliant.
- Our plating process contains neither hexavalent nor trivalent chromate.
- This saves cost as now there is no need to test for hexavalent presence.

Additional information and Sherex white paper available at www.sherex.com

Ordering & Inquires

When inquiring about the CR and CRE Series finishes, simply replace the first 2 letters of the part number with CR or CRE.

Example: CAL2-2520-165 becomes CREL2-2520-165

For non-standard finish, contact Sherex for ordering details.

Sherex CR Black = CRB, Sherex CR Yellow = CRY, Sherex CRE Black = CREB

SHEREX LOCSERT®

SHEREX LOCSERT®

Sherex Locsert® is a proprietary adhesive that is pre-applied under the head of the rivet nut. When installed, the adhesive bonds the rivet nut to the base material, greatly increasing the force required to spin the rivet nut. This is commonly referred to as “spin out.”

PRODUCT FEATURES AND BENEFITS

- Base material must be a ferrous or non-ferrous metal.
- Base material should not be painted or powder coated (finish will reduce performance).
- Base material should be as clean as possible prior to rivet nut installation.
- Hole should be relatively free of burrs.
- Bonding begins immediately, but allow 2-3 hours for approximately 75% curing. Locsert® will be fully cured within 24 hours.
- Locsert® performance will improve 20-30% when post bake associated with e-coat, powdercoat or paint finish is performed *AFTER* Locsert® installation.

Base Material: 1018 steel, 70HRB, .063 thickness

Part Number	Spin Out (in - lb)	As Locsert®	Set Time
CAL2-2520-165	42.90	90.08	3 hours

For additional testing data, please contact Sherex

SEAL 2 SEALING system

SHEREX SEAL 2 SEALING SYSTEM

Sherex Seal 2 has been designed for use in applications where it is necessary to seal fluid or air leakage from under the head. Seal 2 provides greater performance over conventional sealing materials such as PVC foam.

BENEFITS

- Resistant to automotive fluids.
- Can withstand temperatures up to 150° C.
- Has been pressure tested to 160 psi of backside pressure with no leakage.
- Seal 2 processed rivet nuts can be installed into any finished materials.
- Seal 2 can pass through a paint bake or other baking process for up to 30 minutes with no reduction in sealing capabilities.
- Can be applied to a standard large flange rivet nut.

CROSS SECTION OF RIV-FLOAT® INSTALLED

STANDARD RIVET NUT INSTALLED

RIV-FLOAT®

- The RIV-FLOAT® series provides easy, accurate, and fast attachment of components in off-center applications.

FEATURES AND BENEFITS

- Accounts for tolerance stack up in joint design and misalignment during service of the joint.
- Floating nut aligns to drive angle of screw virtually eliminating cross threading and spin out.
- Allows for installation in post painted or powder coat applications where riveted nut plates or cage nuts are typically used
- RoHS compliant Zinc electroplate to 8µm with trivalent chromate - 96/240 hrs (WR/RR)
- Designed with higher thread strength than regular rivet nuts
- Mechanically locked RIV-FLOAT® is available with prevailing torque feature to IFI spec 100/107

UNINSTALLED

INSTALLED

CENTERING NOSEPIECE

- The RIV-FLOAT® series should be installed with the FLEX-5 Hydro-Pneumatic Tool with a RIV-FLOAT® Anvil.

RIV-FLOAT®-SHORT

**RIV-FLOAT®
SHORT
series**

CROSS SECTION OF RIV-FLOAT®-SHORT Installed

Standard Rivet Nut Installed

FEATURES AND BENEFITS

- Accounts for tolerance stack up in joint design and misalignment during service of the joint.
- New Low-Profile design provides greater backside clearance.
- Allows for installation post finish in applications where riveted nut plates or cage nuts are typically used.
- Mechanically locked RIV-FLOAT®-Short available with prevailing torque feature to IFI SPEC 100/107.
- 0.020" Radial Float.
- RoHS Compliant.

- The RIV-FLOAT® series provides easy, accurate, and fast attachment of components in off-center applications.

FLOATING TECHNOLOGIES

RIV-FLOAT®-SHORT vs. Riveted Nut Plates vs. Cage Nuts

RIVETED NUT PLATE

- Requires three holes to be drilled (1 for the plate & 2 for the rivets).
- Requires access to both sides of the work piece.
- 15-20 second installation time.

CAGE NUT

- Requires a square hole to be punched.
- Requires access to both sides of the work piece.
- 15-20 second installation time.

RIV-FLOAT®-SHORT

- Only 1 round hole needs to be drilled.
- Access from only one side of the work is necessary for installation.
- 2-3 second installation time.

SINGLE KITS - RIV-FLOAT®-SHORT

- | | |
|--------------------|--|
| • RNHT-0832RFS BAG | 1 Installation Tool, 1 Mandrel, 15 Rivfloat Shorts |
| • RNHT-1032RFS BAG | 1 Installation Tool, 1 Mandrel, 15 Rivfloat Shorts |
| • RNHT-M4RFS BAG | 1 Installation Tool, 1 Mandrel, 15 Rivfloat Shorts |
| • RNHT-M5RFS BAG | 1 Installation Tool, 1 Mandrel, 15 Rivfloat Shorts |

MULTI KITS - RIV-FLOAT®-SHORT

- | | |
|----------------------|--|
| • RNHT RFS Inch Kit | 1 Installation Tool for 8-32, 1 Mandrel, 1 Installation Tool for 10-32, 1 Mandrel, 1 Installation Tool for 1/4-20, 1 Mandrel, (30) 6-32, (30) 8-32, (30) 10-32 and (20) 1/4-20 Rivfloat Shorts |
| • RNHT RF Metric Kit | 1 Installation Tool for M4, 1 Mandrel, 1 Installation Tool for M5, 1 Mandrel, 1 Installation Tool for M6, 1 Mandrel, (40) M4, (30) M5 and (20) M6 Rivfloat Shorts |

RIV-FLOAT®-SHORT is installed with a **FLEX-5** Hydro-Pneumatic Tool with a RIV-FLOAT®-SHORT Anvil

RIV-FLOAT®-Short is patent pending

LARGE SIZE RIVET NUT SERIES

**LARGE
SIZE
series**

The first product line of its kind offering Rivet Nuts up to 3/4-10 (M20)

FEATURES AND BENEFITS

- Provide a strong thread in thin sheet materials.
- Can be installed from one side of the work piece.
- Do not need to be welded to the base material.
- Available in a Round Body or a Full Hex Body for increased spin out resistance.
- Plated with a RoHS compliant Zinc Trivalent Clear plating.

SIZES AND STYLES

- Unified Sizes Available:
 - 1/2" Thread Round Body & Hex Body
 - 5/8" Thread Round Body & Hex Body
 - 3/4" Thread Round Body
- Metric Sizes Available:
 - M12 Thread Round Body & Hex Body
 - M16 Thread Round Body & Hex Body

Large Size rivet nuts are designed to be installed with the Sherex Flex 18 (see page 42 for details).

Contact Sherex for test data.
 Sherex rivet nuts are compatible with the following hardware:
 GRADE 2, GRADE 5, CLASS 8.8 and CLASS 9.8
 Please contact Sherex when using other grade fasteners.

HAND TOOLS

RIVET NUT HAND TOOLS

LHF TOOLS

LHF 202 (Imperial Tool) Includes: 8-32, 10-24, 1/4-20 head sets

LHF 202M (Metric Tool) Includes: M4, M5, M6 head sets

This hand tool was designed to install any rivet nut ranging in size from 6-32 to 1/4-28 (M4-M6), and is ideal for small production work and prototyping.

RIVET NUT PNEUMATIC SPIN - SPIN TOOLS

**RIVET NUT
PNEUMATIC
SPIN-SPIN
TOOLS**

Designed for installing steel or aluminum CAL, CAK, CAH, CAO, CFT/CAT*, CFW/CAW* and CPB rivet nut inserts. Features quick change nose piece for head set replacement without tools.

*Can install stainless steel.

*Contact Sherex for Prebulbed (CPB) Mandrel part numbers

Contact SHEREX for SSG Replacement part numbers.

*Weight for 800 series only.

High temperature grease should be used to lubricate the bearing set. Contact Sherex for availability.

Sherex recommends the use of an air regulator, air filter, and lubrication system to reduce the wear of internal components. It is also recommended to lubricate the mandrel to increase performance. Mandrels should be replaced when excessive thread wear occurs with a high quality socket head cap screw.

HYDRO-PNEUMATIC FLEX-5 TOOL

**FLEX-5
TOOL**

One Tool With Pull to Pressure & Pull to Stroke Capabilities

FLEX-5P: The Sherex FLEX-5P utilizes a Pull to Pressure method of installation. This method allows the same insert type to be installed into varying material thicknesses (within the Grip Range of the part) without any adjustment to the tool.

FLEX-5S: The Sherex FLEX-5S utilizes a Pull to Stroke method of installation. This method allows the insert to be installed to the same distance each time. This is helpful when installing into soft materials (prevents crushing of the base material) or when a specific Installed Length is required.

*View our FLEX-5 videos at www.sherex.com

FEATURES AND BENEFITS

Change over kit for converting between pull to pressure and pull to stroke

- Installs Rivet Nuts from: M3-M10 and #4-40-3/8-16.
- Push to start nose piece to spin on fastener.
- Single stage trigger.
- Automatic reverse with manual reverse bypass.
- Quick change mandrel design.
- Light weight (4.2 lbs).
- Can be suspended from a balancer.
- Socket head cap screw mandrel.
- Installs Rivet Nut Studs from M5-M8 and #10-24-5/16-24.
- Available in an in-line version.
- Split tool available (remote booster for lighter tool).
- Upgradeable to process monitoring.
- 5,000 lbs (22 kN) pulling force at 90 psi.
- 7 mm (0.276 in.) of available stroke.
- 2-3 second cycle time.
- All aluminum design for improved durability.

M12	MA-312-12MM	MA-322-12MM
M14	MA-314-14MM	MA-324-14MM

The MS 100 Rivet Nut installation tool installs rivet nuts from 5/16-18 to 1/2-20 and M8 and M14. It also installs 5/16 -18 and M8 Riv-Float®. The MS 100 tool comes with one mandrel and one anvil.

The MS 100 Rivet Nut installation tool should be operated at 80-100 psi. Sherex recommends the use of an air regulator, air filter and lubrication system to reduce the wear of internal components. It is also recommended to lubricate the mandrel to increase performance. Mandrels should be replaced when excessive thread wear occurs.

HYDRO-PNEUMATIC FLEX - 18 TOOL

FLEX18 TOOL

FEATURES AND BENEFITS

The most powerful tool on the market providing Pull to Pressure and Pull to Stroke installation capabilities.

- Installs Rivet Nuts from M8 to M16 and 5/16-18 to 3/4-10.
- Push to start nose piece to spin on fastener.
- Single stage trigger.
- Automatic reverse with manual reverse bypass.
- Quick change mandrel design.
- Socket head cap screw mandrel for sizes up to M12 and 1/2-20.
- Can be suspended from a balancer.
- **18,000 lbs. (80 kN) of pulling force.**
- **15 mm (.591 in) of available stroke.**
- Upgradeable to process monitoring.
- 2-3 second cycle time.
- Light weight handle (8.0 lbs.).
- All aluminum handle design for improved durability.

FASTENING SYSTEMS ENGINEERED FOR PERFORMANCE™

Benefits of Full Hex Rivet Nuts vs. Welded Hex Fasteners

The challenge:

A manufacturer of agricultural equipment was experiencing insufficient throughput rates in its baler product lines.

- The issue was determined to be a result of the welding process used in the numerous attachment points.
- The manufacturer wanted to improve the work environment by reducing the amount of emissions and vapors caused by the welding process.

The solution:

Working directly with the manufacturer, the Sherex engineering team designed a new line of full hex rivet nuts to meet the application performance requirements.

- The new full hex rivet nuts significantly increased the application spin out resistance during installation.
- Sherex provided a complete installation solution to the customer: full hex rivet nuts and the FLEX-5 tool.

- This new process replaced the previous welding process, increasing throughput by 50%.
- Additionally, the new solution eliminated all emissions and vapors associated with the welding process, which led to a safer working environment for the assemblers.

The savings:

Annual usage of the rivet nuts: 1,000,000

Cost savings: \$0.12 per weld = \$120,000 annual savings!

Sherex is a global manufacturer with a unique market approach in engineered fastening solutions that combines fasteners, tooling, and automation to deliver the best solution at the **lowest total installed cost**.

Benefits of In-Die Fastener Installation vs. Welded Fastener Methods

The challenge:

A manufacturer of automotive safety systems was experiencing a high fallout rate at the attachment point of the seat belt retractor assembly.

- The failure was determined to be a result of the secondary welding process that was required to attach the nut to the sheet metal component.
- This process caused a very high percentage of thread damage and distortion of the welded nut.

The solution:

Sherex introduced the manufacturer to an MDS automation in-die fastener installation system.

- By utilizing the MDS automation installation system and incorporating a clinch nut design into the seat rail, the manufacturer was able to produce the sheet metal stamping and place the fastener in the same operation.

- This improvement eliminated the welding process that caused the thread damage.
- The new clinch nut automated process simplified the component manufacturing process by reducing the number of required steps and reduced on-site inventory.

The savings:

Annual part assemblies: 450,000

Cost savings: \$0.37 per part = \$166,500 annual savings!

Sherex is a global manufacturer with a unique market approach in engineered fastening solutions that combines fasteners, tooling, and automation to deliver the best solution at the **lowest total installed cost**.

These are illustrative examples of actual experiences and are intended for sales purposes only.

TESTING METHODS

PULL OUT

Definition:

- Pull Out occurs when threads are pulled from the rivet nut (ultimate thread strength) or base material is distorted and the entire rivet nut pulls through the base material.

Causes:

- Hole size is too large.
- Forces applied to the joint are higher than anticipated.

SPIN OUT

Definition:

- Spin Out is the amount of torque required to make a rivet nut spin in the hole it was installed in.

Causes:

- Bolt cross threads into the rivet nut causing it to spin.
- Excessive corrosion causes bolt to bind in the nut.
- Using a screw with mechanical locking feature that has higher prevailing torque than the spin out of the rivet nut.

TORQUE OUT

Definition:

- Torque force required to strip threads out of the rivet nut.
- This method of testing sandwiches the head of the rivet nut between the non-rotational mating part and parent or base panel.
- Spin Out is not a factor because tightening the bolt on the non-rotating part holds the rivet nut in place and prevents it from spinning.

Causes:

- Assembly torque is too high causing thread failure.
- Improper grade of fastener used.

*Torque can be affected by various factors such as coefficient of friction of the finish, prevailing torque, washers, etc... Sherex recommends you test your application.

SUGGESTED ASSEMBLY TORQUE

Definition:

- Recommended torque for assembling a rivet nut joint with class 8.8/grade 5 hardware.

Contact Sherex should you require Grade 8, Class 10 or higher joint strength.

CUSTOM PRODUCT SHOWCASE

CUSTOM PRODUCT SHOWCASE

Sherex has the capability to create custom products for our customers; our in-house engineering and manufacturing teams work with customer to create specialized fastening solutions. Here are some examples of custom products created by Sherex:

M6 stud was developed for an attachment point to a truck frame. Design incorporated wedgehead feature for increased spin out resistance and the MATHread® screw design for reduced cross thread risk during assembly. Application incorporated Sherex Process Monitoring Tooling to ensure each part was properly installed.

Was developed to attach a molded plastic cover to a base unit. If the rivet nut has an outside thread to accept a nut, the plastic cover could be altered and the external thread of the rivet nut could be used for the attachment point.

Designed with an extra large head to act like a spacer.

Sherex developed this part to add increased spin out resistance in soft materials. Special knurl design provides increased engagement with the base material. Small flange provided near flush installation.

Special small grip part designed for materials thinner than .030 inches.

A replacement for a more expensive, machined component that would periodically spin-out. The customer required a low-profile insert with high spin-out resistance. Sherex developed this part has a half-hex body to increase spin performance, 0.145" max installed length, and higher strength threads to withstand installation forces.

* MATHread® is a registered trademark of MATHread Inc.

**CUSTOM
PRODUCT
SHOWCASE**

CUSTOM PRODUCT SHOWCASE

Sherex has the capability to create custom products for our customers; our in-house engineering and manufacturing teams work with customer to create specialized fastening solutions. Here are some examples of custom products created by Sherex:

Sherex developed a high strength rivet nut that is compatible with class 10.9 bolts. This design incorporates a full hex body for increased spin out resistance. It also ensures the bolt is the failure mode, which is a best practice when working with structural applications.

Special head and wedge design to meet spin-out requirements in an application.

Sherex shouldered rivet nut was developed for attachments in plastics. The shoulder design provides a positive metal to metal installation redirecting the load of the joint through the rivet nut shoulder. This minimizes the plastic from creeping during assembly and maintains joint clamp load.

M6 prebulbed slotted body design incorporated under head wedges to increase the spin out resistance in soft plastic.

5/16-18 prebulbed slotted body style with a trimmed head. This head feature allowed installation in the field by the consumer or assembler when used with a special low cost installation tool. Feature also allows head to sit flush within a slot to prevent spin out.

Closed end design with o-ring and o-ring recess under head provides the ultimate sealing solution for attachment points in applications with chemicals and other fluids that breakdown other sealing compounds.

DESIGN SUPPORT CAPABILITIES

- Sherex combines design & engineering support to ensure the end user is using the correct fastener for the application.
- Sherex utilizes Solidworks 3D modeling.

SHEREX PRODUCTION

- Sherex Production Capabilities
 - Multi-station progressive forming machines for deep extrusions
- Production methods used:
 - Machining
 - Tapping
 - Drilling
 - Stamping
 - Assembly
 - Additional supporting equipment

SHEREX QUALITY

- Statistical Process Control (SPC)
 - Used in the manufacturing process
 - Critical for use in Level 3, Rev 4 PPAP
- Sherex quality labs use the latest in testing equipment to ensure our products meet stringent quality requirements.
 - Computerized tensile machine
 - Salt spray booth
 - Torque testing
 - Standard measuring equipment
 - Gauging equipment
- Advanced optical sorting equipment is available for automotive and critical parts
